Concept

Whirlpool can explain as a rapidly rotating current of water, a vortex. But in my design, whirlpool is explain as a kind of magnetic which can impelling force into which one may be pulled. Hillsdale is the town has that magnetic, that magnetic is its nature beauty that can attract traveler from other cities. My design is mainly focusing on sand beach, stock mill and parking lot. Sand Beach a very important point of interest, traveler and residents come to here fishing, picnic and boating. To well develop this place can help to improve the economic and bring some business into the town. New playground facilities and a new restroom with ticket office is re build in sand beach, two volleyball court and decks are added in sand beach, this is a recreation area. Stock mill is an abundant buildings, the rare shape of the building is worth to keep, so I was thinking to remodel it and build as an art or a music center, a gather place for people to listen to concert or watch a drama or even have an art exhibit. The new renovate building is covered with glass. An elevator is built in site the building which can create a good view when people are using the elevator. To renovation stock mill, To renovation stock mill, I also had rebuild the parking lot next to mill stock, as a new function use for stock mill, there will need more parking space for people to park their cars during a event or regular daily use. The parking lot has a steep slope at the north side of the parking lot, the deep slope gives people inconvenience walking. So to redesign this parking lot, it will have three stairs connect to the left, right and middle side of the parking lot. Fountains seating area is created for people to relax or waiting for each other after an event, convenient is my main focus on this parking lot. The renovation sand beach, stock mill will attract more people either out side of state traveler of local residents to come to Hillsdale to have a wonderful weekend or holiday. The attraction is like a whirlpool, people will addict to love this town.
